VENKATESAN E

Software Developer | Java | Spring Boot | Python | React | MySQL | DSA | Java Full Stack Developer

venkatesaneswaran2006@gmail.com | GitHub | LinkedIn | 9345980611 | ERODE

PROFESSIONAL SUMMARY:

Software Developer with a strong foundation in software engineering and algorithmic problem solving. Experienced in building and deploying full-stack applications and translating requirements into functional, user-focused software. Strong understanding of software development principles, with hands-on experience in application development, APIs, and databases. Focused on writing efficient, maintainable code and solving complex technical problems to deliver reliable software solutions.

TECHNICAL SKILLS:

Programming: Java, Python, C++, JavaScript

Backend & Frameworks: Spring Boot, Node.js, REST APIs

Frontend: HTML, CSS, React.js

Data & Databases: SQL, MySQL, MongoDB

Core Concepts: Data Structures & Algorithms, OOP, Database Fundamentals, Problem Solving

PROJECTS:

AetherNote | Cloud-Based Notepad:

- Built and deployed a cloud-based notepad application using React.js and Firebase.
- Implemented create, edit, delete, and real-time note-management functionality.
- Worked with a cloud-hosted backend and application data lifecycle, providing practical exposure to cloud-based application development.

Tamil Sign Language to Speech Translator:

- Developed a Tamil Sign Language to Speech Translator using Python, MediaPipe, Machine Learning, and Text-to-Speech.
- Processed gesture data and transformed recognized inputs into Tamil text and speech.
- Applied Python-based data processing and machine-learning workflow concepts to build an end-to-end application.

E-Commerce Website:

- Implemented product browsing, user authentication, shopping cart, and order-management functionality.
- Designed application interactions with relational database data for transactional workflows.

INTERNSHIP:

AI/ML Intern- TechForge, Salem (Onsite) **Jan 2026**

- Developed machine-learning models and performed data preprocessing to prepare datasets for model development and evaluation.
- Analysed model performance using evaluation techniques and supported the improvement of machine-learning solutions through data-driven analysis.

Data Analytics Intern- IDM, Erode (Onsite) **Jul 2025**

- Analysed and prepared datasets using Excel, SQL, and Pandas to identify patterns, trends, and actionable insights.
- Performed data cleaning, transformation, and validation to improve data quality and support accurate analysis.
- Built interactive Power BI dashboards to visualize key metrics and communicate data-driven insights.

EDUCATION:

B.Tech Information Technology | Nandha Engineering College **2023 - 2027**
CGPA: 8.30/10

HSC | SPB Matric Higher Secondary School **2022 - 2023**
Percentage: 84.5%

ACHIEVEMENTS:

Solved 600+ Data Structures & Algorithms problems on LeetCode

Secured 3rd Prize in Nandha Innovation Day for innovative project development.
