PROFESSIONAL SUMMARY

Final-year B.E. Computer Science and Technology student with a strong interest in technical training, problem-solving and employability skills. Hands-on experience with Python, SQL and Java fundamentals through internships and projects involving teamwork and structured documentation. Eager to learn, upgrade technical skills and support students in building placement-ready confidence.

EDUCATION

B.E. Computer Science and Technology 2023 – 2027
Vivekanandha College of Engineering for Women

Higher Secondary Education 2022 – 2023
Shri Renuga Vidhyalayam MHSS

TECHNICAL SKILLS

- **Programming:** Java (core certification), Python, C++, SQL
- **Core Concepts:** Object-Oriented Programming, Machine Learning Fundamentals, Relational Database Design (3NF), Query Optimization
- **Tools:** Git, GitHub, VS Code, Selenium, Pandas, NumPy, OpenCV, ESP32 (IoT)
- **Problem Solving:** Debugging, logical problem-solving, data processing and analysis
- **Communication & Soft Skills:** Technical documentation, teamwork (Agile collaboration), user-behavior analysis, willingness to learn

INTERNSHIP EXPERIENCE

Database Intern — Femtosoft Technologies, Chennai May 2025 – Jun 2025
- Wrote and optimized SQL queries across core relational tables for a warehouse management system.
- Applied 3NF normalization principles, reducing data redundancy by 15%.
- Collaborated in a 4-member team on schema design and prepared structured technical documentation.

Python Intern — Cybernaut Jan 2025 – Feb 2026
- Developed Selenium-based web scraping pipelines to collect and structure 10,000+ data records.
- Built Pandas data processing scripts that improved processing efficiency by 20%.
- Debugged and optimized code to ensure reliable, repeatable execution.

UI/UX Virtual Intern — Novitech Solution Nov 2024
- Analyzed user-behavior patterns across 4+ digital interface workflows to support UI/UX design decisions.

PROJECTS

VidyutSetu — Smart Electricity Complaint Management System
- Built a complaint management platform with separate admin and public-facing interfaces.
- Implemented complaint submission, withdrawal and automatic resolution notifications end to end.
- Resolved environment and deployment issues to maintain a stable development setup.

Sign Language Translator Using Machine Learning
- Developed a real-time gesture recognition model using 21 hand-tracking landmarks with OpenCV.
- Converted recognized gestures into text and speech output to support communication.

Smart IoT LT Line Protection System
- Built an ESP32-based pipeline integrating 3+ sensor arrays for live line protection.
- Streamed operational status data to a cloud dashboard for real-time monitoring.

CERTIFICATIONS

- NPTEL — Data Science for Engineers (IIT Madras)
- Python, Java and C++ Core Certifications — Cybernaut
- Workshop — Artificial Intelligence, Machine Learning and Robotics Automation
