Education

Paavai Engineering College — Sep. 2023 – May 2027

Bachelor of Engineering in Computer Science and Engineering — *Namakkal, Tamil Nadu*

Relevant Coursework

- Data Structures and Algorithms using Java
- Career Essentials in Generative AI
- Software Engineering and Agile Software Development
- Employability Skills – Job Ready
- Java Database Connection: JDBC and MySQL
- Career Essentials in GitHub Professional Certificate
- Design Fundamentals with AI
- HTML, CSS, and JavaScript for Web Developers

Experience

Website Corporation — May 2026 – Present

Full Stack Web Developer — *Namakkal, Tamil Nadu*

- Built and delivered features for 50+ web development projects, contributing to frontend and backend implementation across diverse client requirements.
- Built responsive user interfaces and integrated backend services using modern full-stack technologies, ensuring functionality and usability.
- Implemented database operations, API integrations, and bug fixes to improve application performance and maintainability. Collaborated with senior developers through code reviews, testing, version control, and deployment, following Agile development practices.

Draupathi It Solutions — January 2025 – January 2026

Full Stack Web Developer Intern — *Namakkal, Tamil Nadu*

- Developed frontend and backend modules for web applications using modern full-stack development technologies.
- Integrated REST APIs, managed relational databases, and implemented efficient data processing workflows.
- Executed application testing, deployment, and technical documentation to support reliable software delivery. Collaborated on multiple development projects, contributing to application performance, code quality, and scalable software solutions.

1M1B (1 million for 1 billion) with IBM Skill Build — December 2025 – January 2026

AI + Sustainability Intern — *Virtual*

- Designed AI-enabled solutions to support sustainability-focused initiatives and community impact projects.
- Conducted research on emerging AI technologies and their applications in environmental and social development.
- Built presentations, reports, and project deliverables based on data-driven insights. Applied Generative AI tools to improve productivity, research quality, and solution development.

AICTE & VOIS — September 2025 – October 2025

Conversational Data Analysis with LLMs — *Virtual*

- Explored Large Language Models (LLMs) for conversational data analysis and natural language understanding.
- Developed AI-driven workflows for processing, analyzing, and interpreting structured and unstructured datasets.
- Applied prompt engineering techniques to improve response quality and optimize interactions with LLM-based applications. Gained practical exposure to Generative AI, data analytics, and real-world use cases through hands-on learning activities.

Infosys Springboard — October 2025 – December 2025

Angular Full Stack Intern — *Virtual*

- Developed the TaxPal – Personal Finance & Tax Estimator for Freelancers application using Angular and full-stack development concepts.
- Built responsive user interfaces and integrated application components to deliver a seamless user experience. Applied frontend development principles, data validation, and business logic to support financial and tax estimation workflows.
- Completed project assignments aligned with industry practices, strengthening skills in Angular, web application development, and software engineering.

Accent Techno Soft — June 2025 – July 2025

Full Stack Developer Intern — *Coimbatore, Tamil Nadu*

- Developed responsive web applications using HTML, CSS, Bootstrap, JavaScript, PHP, and MySQL, delivering user-friendly interfaces and seamless functionality.

- Implemented CRUD operations and integrated MySQL databases to enable secure and efficient data storage and retrieval.
- Integrated frontend components with backend services, improving application performance and ensuring reliable data processing. Performed application testing, resolved functional issues, and maintained source code using **Git**, contributing to stable and maintainable web solutions.

Projects

AI-Based Prediction of Adsorption Efficiency for Heavy Metal Removal | Python, Scikit-learn ***January 2026 – Present***

- Developed a machine learning model using Linear Regression to predict heavy metal adsorption efficiency from experimental parameters.
- Processed and analyzed datasets by performing data preprocessing, feature selection, and model evaluation to improve prediction accuracy.
- Visualized prediction results and generated analytical insights to support sustainable wastewater treatment research.

Real-Time Women Safety System | *Python, IoT, GPS, Firebase* **February 2026**

- Developed an IoT-based women safety system with GPS tracking and emergency alert functionality for real-time assistance.
- Integrated cloud services to transmit live location and emergency notifications to predefined contacts.
- Designed a scalable architecture connecting IoT devices, cloud storage, and mobile applications for continuous monitoring.

GenFolio – AI Portfolio Generator | *React, Node.js, MongoDB, Generative AI* **November 2025**

- Developed an AI-powered platform that automatically generates professional portfolios from user-provided information.
- Integrated Generative AI APIs to create profile summaries, project descriptions, and technical content dynamically.
- Built responsive frontend interfaces and backend APIs for secure data management and portfolio generation.

Student-Faculty Management System | *PHP, MySQL, HTML, CSS, Bootstrap* **August 2025**

- Developed a role-based web application to manage student, faculty, attendance, and academic records.
- Implemented secure authentication, CRUD operations, and MySQL database integration for efficient data management.
- Designed responsive interfaces to simplify administrative workflows and improve user experience.

Automatic Timetable Generator | *Java, MySQL, HTML, CSS* **September 2025**

- Developed an automated timetable generation system based on faculty availability, classroom allocation, and course schedules.
- Implemented scheduling algorithms to eliminate timetable conflicts and optimize resource utilization.
- Integrated a database-driven interface for timetable creation, modification, and academic schedule management.

Technical Skills

Languages: Python, Java, HTML/CSS, JavaScript, SQL, Node.js, Flask, PHP Server
Developer Tools: VS Code, Eclipse, MongoDB, MySQL, Android Studio, Google Collab, XAMPP, Microsoft 365, Firebase
AI & Data: LLM-based Data Analysis, Generative AI, Machine Learning, Deep Learning
Embedded Systems: Embedded Development, Sensor Integration, Power Management, Debugging

Publications

EcoBinX: Smart AI Dustbin: Recent Trends in Materials Science & Devices | Published
IoT Based Smart Irrigation and Soil Nutrient Management System: International Journal for Research Trends and Innovation | Published

Extracurricular

Youth For Seva (YFS) **Apr 2026 – Present**
Student Volunteer

- Contributed to community service initiatives that promoted social impact, teamwork, and leadership through volunteer engagement.

iVolunteer **Mar 2026 – Present**
Student Volunteer

- Contributed to community service initiatives that promoted social impact, teamwork, and leadership through volunteer engagement.

Indian Red Cross Society (IRCS) **Feb 2026 – Present**
Member

- Participated in blood donation drives and health awareness campaigns, demonstrating commitment to humanitarian service and community welfare.

Talent Quest for India **Jan 2026 – Present**
Volunteer

- Mentored and supported students through educational initiatives, fostering knowledge sharing and community development.
