EDUCATION

B.E. in Computer Science & Engineering

Kongunadu College of Engineering and Technology, Trichy

CCPA:7.2 (2023 – 2027)

Secondary (12th Grade Higher)

Sri Ramakrishna Boys Matriculation Higher Secondary School

Percentage:84% (2022-2023)

SKILLS

Programming Language

- Java
- Python

Web Technologies

- HTML
- CSS

DataBase

- MongoDB

SUMMARY

Computer Science and Engineering graduate with a strong foundation in Python, Java, Machine Learning, and Artificial Intelligence. Passionate about software development, problem-solving, and continuously learning emerging technologies.

PROJECTS

Real-Time Patient Monitoring System

- Developed a real-time computer vision system to detect abnormal patient activities & generate critical alerts using OpenCV & YOLOv8 to improve response times to critical events.
- **Technologies Used**: Python, OpenCV, YOLOv8

Blockchain-Based Secure Tender System

- Developed a decentralized e-tender system using Ethereum smart contracts and IPFS storage to ensure transparent & tamper-proof procurement and React & Node.js bid evaluation & prevent unauthorized data modification.
- **Technologies Used**: React.js, Node.js, Ethereum, IPFS

AI-Based Career Guidance & Skill Recommendation System

- Developed an AI-based Career Guidance System using Generative AI to analyze user interests, skills, and academic background, providing personalized career recommendations, skill roadmaps, and learning resources for informed career planning.
- **Technologies Used:** Python, Flask, Generative AI

HACKATHONS

- Sustain-AI-Thon - Rental Management Application
- IMPACTX 3.0 - AI-Powered Conversational System for ARGO Float Data
- HACKFUSION 1.0 - Centralized EHR System with Intelligent Disease Identification
- AISE HACK 2026 - Pollution Forecasting(Official Hackathon Dataset)

PUBLICATION

- Blockchain-Based Secure Tender System for Transparent E-Procurement– IJVRA International Journal, March 2026.

LANGUAGE

- Tamil
- English

INTERNSHIP

UI/UX Intern - Frontline Technologies (June 2025)

- Participated in a short-term industry exposure.
- program focused on UI/UX fundamentals.
- Analyzed UI/UX workflows and real-world design discussion processes.

GEN AI Intern - DigiDARA (July 2025)

- Participated in a short-term industry exposure program focused on Generative AI fundamentals.
- Gained hands-on understanding of large language models, prompt engineering, and AI-assisted workflows.
- Explored real-world use cases of GenAI in content generation, automation, and intelligent assistance systems.

CLOUD COMPUTING - Samcore Solution (December 2025)

- Studied deployment workflows, basic cloud architecture, and resource management concepts.
- Explored compute, storage, and networking components used in cloud environments.
- Understood real-world use cases of cloud platforms for scalable application deployment.

CERTIFICATIONS

- **Hackathon Participation** - Sustain-AI-Thon (VIT Chennai) , IMPACTX 3.0 (St. Joseph's Chennai) ,HACKFUSION 1.0 (Jeppiaar Chennai), GUVI-HCL AI Impact Summit Buildathon India'26 ,AISE HACK 2026(IIIT Hyderabad)
- **WorkShops** - Full Stack Development Workshop , GenAI & XAI Workshop, Data Analyst Bootcamp
- **Valued Course** - Java(Yellomatics) , Python (Django)
