CAREER OBJECTIVE

A dedicated and self-driven candidate with an interest in application design and working knowledge of Java and SQL. Looking for an opportunity to learn, grow, and apply my skills in a professional environment while contributing to the organization's development.

TECHNICAL SKILLS

Languages: Core Java, SQL
Frontend Technologies: HTML5, CSS3, JavaScript, Responsive Web Design
Backend Technologies: Core Java, JDBC
Databases: MySQL, Oracle
Concepts: Object-Oriented Programming (OOP), CRUD Operations, Database Integration

ACADEMIC QUALIFICATIONS

B.Tech – Computer Science and Business Systems - CGPA: 7.7
Knowledge Institute of Technology | Sep 2021 – May 2025
Class XII (HSE) - 82.33%
The Little Flower Higher Secondary School | June 2019 – April 2021
Class X (SSLC) - 80%
The Little Flower Matriculation School | June 2018 – March 2019

INTERNSHIPS

Java Full Stack Web Development (6 Months)
Tap Academy | May 2025 – Dec 2025

• Engineered backend modules using Core Java, JDBC, and SQL, handling business logic for 2 full-stack web applications.
• Built responsive, user-friendly interfaces using HTML5, CSS3, and JavaScript with attention to cross-browser compatibility.
• Implemented MVC architecture and performed CRUD operations integrated with MySQL databases across multiple projects.
• Collaborated in building and testing full-stack web applications through hands-on team projects, applying Git for version control.

Java Programming (1 Month)
Intern Pe | May 2024

- Gained hands-on experience in core Java concepts including variables, data types, control statements, and loops.
- Learned Object-Oriented Programming (OOP) concepts such as classes, objects, inheritance, polymorphism, and encapsulation.
- Developed basic Java programs to strengthen logical and problem-solving skills.
- Created a simple two-player Tic Tac Toe game where players take turns marking X and O on a 3×3 grid, aiming to align three marks horizontally, vertically, or diagonally to win, or end in a tie when the grid is full.

Web Development (1 Month)

Edu Phoenix | July 2023

- Gained hands-on experience in HTML and CSS for building web pages.
- Learned the fundamentals of website structure, layout design, and basic UI principles.
- Developed simple web pages and forms following best coding practices.
- Created a blog webpage using HTML elements such as image (img) and anchor (a) tags.
- Designed and built a basic personal portfolio website showcasing skills and projects.

PROJECTS

Public Schemes With Conversational AI

Python(Flask, PyTorch, NLTK), HTML, CSS | Github-link

Description:

- Developed a Conversational AI chatbot to provide users with information about various government public schemes and benefits.
- Designed the chatbot to interact with users using predefined intents and responses, simulating natural conversational flow.
- Enabled users to quickly find relevant scheme details by responding accurately to user queries.
- Built a user-friendly frontend interface using HTML and CSS for seamless chatbot interaction.

Food Delivery Web Application

Java, JDBC, MySQL, HTML, CSS, JavaScript | Github-link

Description:

- Engineered a full-stack food delivery platform enabling users to browse 10+ restaurants, view menus, and place orders end-to-end.
- Designed and implemented backend business logic using Java and JDBC with a MySQL schema covering 6 tables: users, restaurants, menus, orders, payments, and profiles.
- Built responsive interfaces with HTML5, CSS3, and JavaScript implemented DOM-based form validation reducing input errors.
- Performed complete CRUD operations for menu management, order placement, and user profile handling.

Online Vehicle Rental System

Java, JDBC, MySQL, HTML, CSS, JavaScript | Github-link

Description:

- Built an end-to-end vehicle rental platform allowing users to browse available vehicles, view details, and complete bookings.
- Implemented backend functionality using Java and JDBC to manage vehicle listings, rental bookings, and payment processing across 5+ database tables.
- Created responsive, mobile-friendly interfaces using HTML5 and CSS3 integrated JavaScript for dynamic content updates.
- Performed CRUD operations for vehicle management, booking requests, and rental history tracking.
