Profile Summary

Final-year Computer Science Engineering student with strong fundamentals in Java, C, and full-stack development, combined with hands-on experience in AI/ML engineering, robotic process automation, and UI-driven application development. Proven ability to design, develop, and deploy scalable intelligent systems including a real-time computer vision surveillance platform, an interactive analytics dashboard, and an end-to-end RPA automation pipeline. Strong communicator with cross-departmental collaboration experience through peer-learning leadership. Seeking to leverage technical expertise, quick-learning ability, and project delivery experience in a high-impact software engineering role.

Education

K.S. Rangasamy College of Technology — Namakkal, Tamil Nadu
B.E. Computer Science and Engineering — CGPA: 7.54 — *2023 – 2027*

Bala Barathi Matric Hr. Sec. School — Salem, Tamil Nadu
Higher Secondary (Class XII) — *2022 – 2023*

Skills

Languages: Java, C
Frontend & Backend : HTML, CSS, JavaScript
AI / ML: LangChain, YOLOv8, OpenCV, Generative AI, Prompt Engineering, NLP
Automation / RPA: Manual Testing, UiPath Studio, UiPath Orchestrator, Workflow Automation, Process Automation
Database: MySQL, SQLite (Relational Databases)
Tools & Platforms: Git, GitHub, Streamlit, Power BI, Vercel, Google Colab,Lovable, Antigravity
Core Competencies: OOPS, Data Structures, Machine Learning, Computer Vision, Full Stack Development, Agile Development, Team Collaboration

Experience

AI Engineering Intern — Infosys Springboard Virtual Internship 6.0 — Dec 2025 – Feb 2026
AI Video Surveillance Platform — *Certificate Link*

- Engineered a real-time AI surveillance platform using YOLOv8 and OpenCV, achieving approximately 92% object detection accuracy across multi-feed video streams.
- Built an automated alert generation module that reduced manual monitoring effort by eliminating the need for continuous human observation across 4+ camera feeds simultaneously.
- Delivered a Streamlit-based dashboard enabling live monitoring, playback controls, and incident logging in a single unified interface.

AI & Cloud Intern — IBM SkillsBuild Internship, Edunet Foundation — July – Aug 2025
AI and IBM Cloud Technologies — *Certificate Link*

- Completed hands-on project development focused on IBM Cloud services and AI model deployment under expert mentorship.
- Designed and tested AI pipelines leveraging IBM Watson tools, gaining practical exposure to enterprise cloud infrastructure and API-based AI integration.

Projects

AI-Based Intelligent Video Surveillance Platform | *YOLOv8, OpenCV, Streamlit, Python*

- Developed a multi-feed smart surveillance system for park environments using computer vision to automatically detect, classify, and report suspicious activities from live CCTV feeds.
- Integrated real-time object detection with automated incident reporting, reducing dependency on manual monitoring and enabling event-driven alerts with timestamped logs.
- System demonstrated stable performance across video streams with frame-level analysis.

Data Pulse — Semester Analytics Dashboard | *React,TypeScript, Excel* | GitHub

- Built a fully automated analytics dashboard processing student academic records for 200+ entries, computing SGPA, tracking arrears, calculating pass percentages, and identifying toppers from raw Excel datasets.
