## Summary

Artificial Intelligence & Data Science undergraduate with hands-on experience building AI applications and solving real-world problems through intelligent systems. Proven ability to design scalable AI solutions, demonstrated by a Generative AI internship and 5 hackathon wins across national competitions. Seeking opportunities to contribute as an AI Engineer while continuously learning and delivering impactful AI solutions.

## Education

**Kongunadu College of Engineering and Technology** — **Trichy, Tamil Nadu**
*B.Tech in Artificial Intelligence and Data Science CGPA: 8.43* — *2023 – 2027*

## Technical Skills

| | |
|---|---|
| **Programming** | Python |
| **Machine Learning** | Probability, Statistics, ML Algorithms, Feature Engineering, Model Evaluation |
| **Frameworks & Libraries** | NumPy, Pandas, FastAPI, Scikit-learn, PyTorch |
| **LLMs & GenAI Stack** | LLMs, API Integration, RAG, MCP, Google ADK, LangChain, LangGraph, LangSmith |
| **AI & Security Layer** | Observability, Gateway, LLM Evaluation (DeepEval), RAG Evaluation (RAGAS) |
| **Version Control & DevOps** | Git, GitHub, Docker |
| **Databases & Vector Stores** | FAISS, Pinecone |

## Experience

**DigiDARA Technologies Pvt. Ltd.** — **Tiruchirappalli**
*Generative AI & Agentic AI Intern* — *July 2025*

- Completed an internship focused on **Generative AI and Agentic AI**, gaining hands-on experience with **LLMs, RAG, Vector Databases, LangChain, LangGraph, ML, and DL**
- Developed **MindMate**, a personalized AI agent combining **RAG pipelines, semantic retrieval, and agentic workflows** to generate context-aware responses
- Integrated **vector-based semantic search and retrieval** to improve response relevance, gaining practical experience in building production-oriented LLM applications

**NexiTence Technology LLP**
*Python Developer* — *Jun 2025 – Jul 2025*

- Built hands-on experience in **web application development** using **HTML, CSS, Python, and Flask**, contributing to front-end and back-end product features
- Explored **Agentic AI** using **Google Agent Development Kit (ADK)**, building agents with **context memory and tool integration** to support multi-step interactions

## Projects

**Syllabex** | ***Python, LLMs, RAG, Vector DB*** | GitHub — **2026**

- Identified that students increasingly dependent on general AI tools like ChatGPT produced inconsistent, non-syllabus answers, causing academic integrity issues and unfair evaluation challenges for educators.
- Addressed the gap in existing solutions — strict AI bans removed AI-based learning while open AI usage caused non-standard, unpredictable answers and evaluation mismatches with no system ensuring both learning and evaluation consistency.
- Built a controlled, syllabus-based AI learning assistant where faculty upload textbooks, notes, and answer keys; content is converted into embeddings via a RAG pipeline to retrieve only institution-approved, syllabus-aligned content.
- Ensured consistent, evaluation-friendly answers across all students by generating clear explanations and syllabus-based responses aligned with answer keys and institutional evaluation standards.

**FloatChat** | ***Python, LLMs, RAG, MCP, LangChain, FAISS*** | GitHub **SIH 2025**

- Developed as a **Smart India Hackathon (SIH) 2024** problem statement solution for real-time oceanographic data analysis using natural language querying.
- Built a **RAG pipeline** ingesting ARGO float NetCDF files into PostgreSQL, enabling natural language querying of complex ocean data using **LLaMA-3-8B and MCP**.
- Implemented **semantic search** using all-MiniLM-L6-v2 embeddings stored in FAISS vector database for context-aware retrieval across temperature, salinity, and depth profiles.
- Developed **interactive visualizations** for float trajectories and depth-based profiles, making complex ARGO data accessible to non-technical users like policymakers and NGOs.

## Hackathon Achievements

1. Secured **5 hackathon wins** across **10+ national and institutional competitions** by developing real world solutions.
2. Awarded **1st Runner-Up at CMR Hackfest 3.0** with a cash prize of ***(INR)* 60,000**.
3. Awarded **1st Prize at GENESIS'26** with a cash prize of ***(INR)* 5,000**.
4. Awarded **3rd Prize at ZenAI Hackathon** with a cash prize of ***(INR)* 5,000**.
5. Awarded **Consolation Prize at ZenAI Hackathon** with a cash prize of ***(INR)* 3,000**.

## Certifications & Achievements

**Data Analysis with Python** **2025**
*freeCodeCamp*

**Practical Machine Learning Bootcamp with Real World Projects** **2025**
*TutorialsPoint*

**Fundamentals of Deep Learning** **2025**
*NVIDIA*
