CAREER OBJECTIVE

Aspiring **Software Developer** with a strong foundation in **Python**, Object-Oriented Programming, **SQL**, **APIs**, and **backend application development**. Experienced in building Python-based applications using Flask, REST APIs, JSON, and data processing techniques. Strong problem-solving skills with hands-on experience developing practical software projects and integrating APIs.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering
CARE College of Engineering, Trichy | **CGPA: 8.68/10**

INTERNSHIP EXPERIENCE

AI Data Engineer Intern | DivineCore Technologies – Salem (Aug 2026 – Sept 2026)

- Performed LLM evaluation to assess response quality, accuracy, and reliability across AI outputs.
- Diagnosed and fixed issues in a broken RAG (Retrieval-Augmented Generation) pipeline, improving the flow of retrieval and response generation.
- Gained hands-on experience with AI, LLMs, RAG, and fine-tuning concepts through practical development and evaluation tasks.

PROJECTS

Automated Attendance System | Python, Telegram Bot API, CSV, JSON (Oct 2025)

- Built a Python-based Telegram bot to automate attendance tracking and notifications.
- Integrated APIs to fetch and process real-time data efficiently.
- Implemented data storage using CSV/JSON for structured record management.

AI-Driven Smart Interview Platform | Python, Flask, NLP, HTML/CSS/JS (April 2026)

- Built the application backend using **Flask** and structured data routing for real-time interview sessions.
- Utilized **Natural Language Processing (NLP)** techniques to analyze text/speech data for response clarity and evaluation tracking.
- Designed the evaluation feedback storage framework using Python to generate personalized performance scores.

AI Reliability & Hallucination Handling System | Python, LLM APIs, JSON (Aug 2026)

- Built a Python-based system to detect and validate unreliable LLM responses.
- Implemented JSON validation, error handling, and automatic retries.
- Tracked validation failures, retries, and final response status.

TECHNICAL SKILLS

- **Programming:** Python, OOP, SQL
- **Backend & APIs:** Flask, REST APIs, API Integration, JSON
- **Python Libraries :** Pandas, Numpy
- **Database:** SQL
- **Tools:** Jupyter Notebook, VS Code, Google Colab, Git & GitHub
- **Soft Skills:** Problem-Solving, Adaptability and Team Collaboration

CERTIFICATIONS

- Python Programming Complete Course - Udemy (Jan 2025)

LEADERSHIP CONTRIBUTION

- Served as **Vice President of CSSA Club** at College (2024 – 2025).
- Served as **Treasurer of CSSA Club** at College (2025 – 2026).
