Summary

Computer Science graduate (B.E. CSE, 2026) with hands-on experience building responsive web applications using HTML, CSS, Bootstrap, and JavaScript, plus an AI voice-automation project using MCP, Twilio, and ElevenLabs. Seeking a **Frontend Developer / Junior Full-Stack Developer** role to build user-friendly interfaces and grow into backend and cloud development.

Technical Skills

Frontend: HTML5, CSS3, Bootstrap, JavaScript (DOM, ES6, Events, Local Storage), Responsive Design, UI Design
Backend and Database: Python , SQLite
AI and Automation: Model Context Protocol, Pipedream, Twilio, ElevenLabs, REST APIs, Automation Anywhere
Tools and Concepts: GitHub, Object-Oriented Programming (OOP), CRUD Operations

Projects

MCP AI Voice Assistant | *Cursor, Pipedream, ElevenLabs, Twilio, MCP* | Watch Demo

- Built an AI-powered assistant that places automated daily phone calls with dynamic updates.
- Used Model Context Protocol (MCP) so tools respond to natural-language requests and trigger cross-app workflows.
- Orchestrated real API workflows to send emails, post on LinkedIn, and schedule tasks.

Todos Application | *HTML, CSS, JavaScript, Bootstrap* | Live Demo

- Built a task manager in vanilla JavaScript with full CRUD functionality (add, edit, delete, mark complete), using DOM manipulation and event listeners for dynamic UI updates.
- Persisted state in local storage, so tasks survive page reloads without a backend.

Food Munch | *HTML, CSS, Bootstrap* | Live Demo

- Built a fully responsive food-browsing website using Bootstrap's grid system and components, tested across mobile, tablet, and desktop breakpoints.
- Added product videos and detailed item descriptions to give customers a clearer view of each dish before ordering.
