# SARAN R

9/155, Rettipatty, Salem, Tamil Nadu-637504

7904403239 saranramesh709@gmail.com linkedin.com/in/saran709 github.com/saran709

CSE student with experience in AI, data analytics, and full-stack development. Strong in problem-solving, communication, and teamwork, with a passion for learning and building practical solutions. Interested in applying technology and data to solve real-world problems and support organizational growth. Eager to learn, adapt, and contribute effectively.

## Education

**Paavai Engineering College** Sep. 2023 – May 2027

*Bachelor of Engineering in Computer Science and Engineering* *Namakkal, Tamil Nadu*

## Relevant Coursework

- Data Structures and Algorithms using Java
- Career Essentials in Generative AI
- Database Management Systems
- Data Analytics
- Java Database Connection: JDBC and MySQL
- Career Essentials in GitHub Professional Certificate
- Design Fundamentals with AI
- HTML, CSS, and JavaScript for Web Developers

## Experience

### Website Corporation — May 2026 – Present

*Full Stack Web Developer* *Namakkal, Tamil Nadu*

- Contributed to 50+ web development projects, implementing frontend and backend features based on diverse client requirements.
- Analyzed client requirements and translated business needs into functional web application features, API integrations, and database solutions.
- Performed debugging, testing, code reviews, version control, and deployment in collaboration with senior developers following Agile practices.

### Draupathi IT Solutions — January 2025 – January 2026

*Full Stack Web Developer Intern* *Namakkal, Tamil Nadu*

- Developed frontend and backend modules for web applications using modern full-stack development technologies.
- Integrated REST APIs and relational databases, implementing data processing and CRUD operations for application workflows.
- Performed testing, debugging, deployment, and documentation, improving application reliability, maintainability, and code quality.

### 1M1B (1 million for 1 billion) with IBM Skill Build — December 2025 – January 2026

*AI + Sustainability Intern* *Virtual*

- Designed AI-enabled solutions to support sustainability-focused initiatives and community impact projects.
- Conducted research on emerging AI technologies and their applications in environmental and social development.
- Created presentations, reports and project deliverables based on research and data-driven insights, communicating technical findings effectively.

### AICTE & VOIS — September 2025 – October 2025

*Conversational Data Analysis with LLMs* *Virtual*

- Explored Large Language Models (LLMs) for conversational data analysis and natural language understanding.
- Developed AI-driven workflows for processing, analysing and interpreting structured and unstructured datasets.
- Applied prompt engineering and Generative AI techniques to improve response quality and support data-driven analysis.

### Infosys Springboard — October 2025 – December 2025

*Angular Full Stack Intern* *Virtual*

- Developed the TaxPal – Personal Finance & Tax Estimator for Freelancers application using Angular and full-stack development concepts.
- Built responsive user interfaces and integrated application components to deliver a seamless user experience. Applied frontend development principles, data validation, and business logic to support financial and tax estimation workflows.
- Completed project assignments aligned with industry practices, strengthening skills in Angular, web application development, and software engineering.

**Accent Techno Soft** **June 2025 – July 2025**

*Full Stack Developer Intern* *Coimbatore, Tamil Nadu*

- Developed responsive web applications using HTML, CSS, Bootstrap, JavaScript, PHP, and MySQL, delivering user-friendly interfaces and seamless functionality.
- Implemented CRUD operations and integrated MySQL databases to enable secure and efficient data storage and retrieval.
- Integrated frontend components with backend services, improving application performance and ensuring reliable data processing. Performed application testing, resolved functional issues, and maintained source code using **Git**, contributing to stable and maintainable web solutions.

## Projects

**AI-Based Prediction of Adsorption Efficiency for Heavy Metal Removal** | Python, Scikit-learn ***January 2026 – Present***

- Developed a machine learning model using Linear Regression to predict heavy metal adsorption efficiency from experimental parameters.
- Processed and analyzed datasets by performing data preprocessing, feature selection, and model evaluation to improve prediction accuracy.
- Visualized prediction results and derived analytical insights to support data-driven decision-making in sustainable wastewater treatment research.

**Real-Time Women Safety System** | *Python, IoT, GPS, Firebase* **February 2026**

- Developed an IoT-based women safety system with GPS tracking and emergency alert functionality for real-time assistance.
- Integrated cloud services to transmit live location and emergency notifications to predefined contacts.
- Designed a scalable architecture connecting IoT devices, cloud storage, and mobile applications for continuous monitoring.

**GenFolio – AI Portfolio Generator** | *React, Node.js, MongoDB, Generative AI* **November 2025**

- Developed an AI-powered platform that automatically generates professional portfolios from user-provided information.
- Integrated Generative AI APIs to create profile summaries, project descriptions, and technical content dynamically.
- Built responsive frontend interfaces and backend APIs for secure data management and portfolio generation.

**Student-Faculty Management System** | *PHP, MySQL, HTML, CSS, Bootstrap* **August 2025**

- Developed a role-based web application to manage student, faculty, attendance, and academic records.
- Implemented secure authentication, CRUD operations, and MySQL database integration for efficient data management.
- Designed responsive interfaces to simplify administrative workflows and improve user experience.

**Automatic Timetable Generator** | *Java, MySQL, HTML, CSS* **September 2025**

- Developed an automated timetable generation system based on faculty availability, classroom allocation, and course schedules.
- Implemented scheduling algorithms to eliminate timetable conflicts and optimize resource utilization.
- Integrated a database-driven interface for timetable creation, modification, and academic schedule management.

## Technical Skills

**Programming:** Python, Java, JavaScript, SQL, PHP
**Web Development:** HTML, CSS, Bootstrap, React, Angular, Node.js, Flask
**Database:** MySQL, MongoDB, Firebase
**AI & Data:** Data Analytics, Machine Learning, Deep Learning, Generative AI, LLM-based Data Analysis
**Tools:** Git, GitHub, VS Code, Eclipse, XAMPP, Google Colab
**IoT & Embedded:** Arduino, Sensor Integration, GPS

## Core Competencies

Problem Solving | Analytical Thinking | Data-Driven Decision Making | Strategic Thinking | Communication | Presentation | Team Collaboration | Leadership | Adaptability

## Publications

**EcoBinX: Smart AI Dustbin:** Recent Trends in Materials Science & Devices | Published – 2026
**IoT Based Smart Irrigation and Soil Nutrient Management System**: International Journal for Research Trends and Innovation | Published -- 2024

## Extracurricular

**LEADERSHIP & VOLUNTEERING**

- Secretary, Paavai Speakers Club — Communication, event coordination and student leadership.
- Student Volunteer, Youth for Seva — Community engagement and teamwork.
- Volunteer, Talent Quest for India — Student mentoring and knowledge sharing.
