PROFILE

Recent graduate trained in SAP FICO with a solid foundation in financial process, master data management, and hands-on practice with configuration such as General Ledger Accounts(GL), Accounts Payable(AP), Accounts Receivable(AR), Controlling, General Accounting, Bank Accounting and Assest Accounting. Strong analytical and problem solving skills with willingness to learn and work in dynamic SAP support and implementation projects.

PROJECT

Developed an automatic accident detection and emergency alert system to notify nearby medical centers in real time

- Used an accelerometer sensor to detect vehicle tilt and collision impact.
- Integrated a heartbeat sensor to determine the severity of the accident.
- Implemented GPS for real time location tracking and GSM for instant message transmission.
- Build an Android application to automatically send emergency alert to hospital and emergency contact.
- Reduced emergency response time through automated and accurate alerting.

CERTIFICATIONS

- Completed professional training in SAP FICO at SQUARES INFORMATION TECHNOLOGY PVT LTD
- Completed vale Added programme in Advanced Java programming
- MSME Certified Lean Six Sigma Yellow Belt
