PROFESSIONAL SUMMARY

Full-stack software engineer with 1+ year of hands-on experience building, deploying, and supporting production web applications using React.js, Next.js, TypeScript, FastAPI, and PostgreSQL. Experienced in designing RESTful APIs and integrating OAuth 2.0, Razorpay, Brevo, and webhook-driven n8n workflows, with cloud deployments on Vercel, Render, and GCP. Skilled at debugging production issues and collaborating in Agile teams across social media management, restaurant operations, and client assessment platforms.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Frontend: React.js, Next.js, HTML5, CSS3

Backend & APIs: FastAPI, RESTful API Development, SQLAlchemy, Microservice & MVC Architecture

Integrations: OAuth 2.0, Webhooks, Razorpay, Brevo, n8n Workflow Automation

Databases: PostgreSQL, MySQL

Cloud & DevOps: Vercel, Render, GCP (Deployment, CI/CD), Git, GitHub

AI & Tools: RAG, Vector Databases, Prompt Engineering, Postman, Thunder Client, VS Code, Power BI

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern – Digiking Service Providers **June 2025 – July 2026**

Social Media Publishing & Management System

- Built a full-stack platform (React.js, FastAPI) that centralizes publishing to Facebook, Instagram, and YouTube, securing third-party API access with OAuth 2.0.
- Designed modular RESTful APIs for content publishing, analytics retrieval, and platform integrations on a scalable backend architecture.
- Implemented a multi-platform publishing engine with scheduled content delivery and automated workflow execution across connected channels.
- Developed responsive React.js interfaces for event and feedback management while working in an Agile team.

Restaurant Operations Platform

- Built React.js and FastAPI modules for tablet-based restaurant management and real-time operational monitoring.
- Designed RESTful APIs for tablet operations, menu management, and transaction processing to improve system reliability and workflow efficiency.
- Debugged production issues by tracing API responses, PostgreSQL records, and application workflows to find and fix root causes.
- Automated Google Sheets synchronization and email delivery with n8n, connecting webhook-driven workflows to FastAPI services.
- Improved UX with reusable React components, dashboard enhancements, and status indicators driven by evolving business requirements.

Client Assessment & Payment Platform

- Owned a production full-stack application end to end (Next.js, TypeScript, FastAPI, Neon PostgreSQL) delivering client assessments through digital payments, and automated report generation.
- Built modular FastAPI and SQLAlchemy APIs for authentication and assessment lifecycle management with a clean, maintainable architecture.
- Integrated Razorpay payments and Brevo email through secure API and webhook workflows for transaction processing and automated customer communications.
- Diagnosed and fixed 8 backend bugs (constraint violations, hardcoded localhost URLs, email/transaction ordering errors) and resolved Razorpay redirect and Render startup failures.
- Managed end-to-end deployment across Vercel and Render, handling environment configuration and production releases.

AI & Data Analytics Intern (TNSDC Sponsored) – SPAARK Technologies, Coimbatore **May 2024 – August 2024**

- Evaluated Generative AI tools (ChatGPT, Claude, Gamma) for AI-assisted business workflows and applied prompt engineering techniques.
- Queried, cleaned, and managed structured datasets with SQL to support analytics initiatives.
- Built interactive Power BI dashboards for data visualization and reporting.

EDUCATION

B.E. in Electrical and Electronics Engineering – CGPA: 8.3
Government College of Engineering, Erode | Anna University – Nov 2021 to May 2025
